

Angle brackets

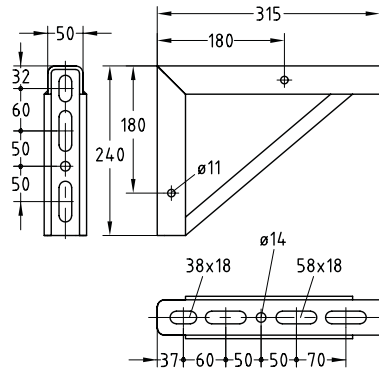

heavy-duty version, hot-dip galvanised

Application

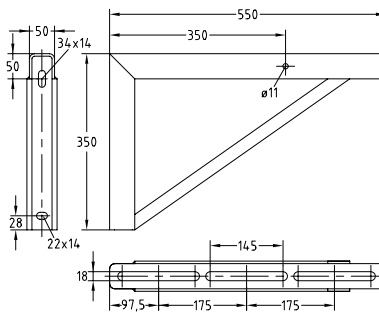

- Installation of pipelines on the wall and ceiling
- For the assembly of fittings and devices
- For indoor and outdoor use

Your advantages

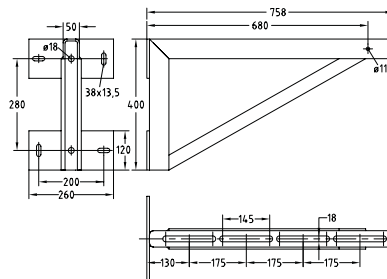

- Particularly stable version for heavy pipelines and aggregates
- Oblong holes for a flexible positioning of the loads
- Variety of lengths covers all construction requirements
- Round holes in the side of the U-profile for additional braces, e.g. at fixed points
