

Mounting cleats

stainless steel

Application

- Pre-fixation of the support channel on welding studs to make assembly easier
- Type KB for pre-fixation on head bolts
- Type GW for pre-fixation on threaded bolts

Your advantages

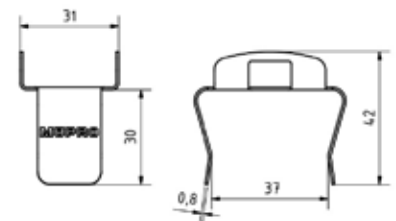

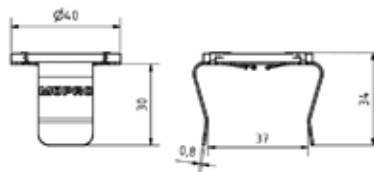

- The support channel can be pre-fixed to the head or threaded bolt without tools
- Free hand for screwing
- The pre-fixed support channel can be flexibly positioned in the hole grid
- Function for profiles 41/31 and 41/41 (sendzimir galvanised, hot-dip galvanised and stainless steel)
- The outer springs make the pre-assembled reinforcement easy to handle
